EDUCATION

Minerva University

2021 - 2025

Bachelors of Science, Computational Sciences

San Francisco, CA, USA

- **GPA:** 3.7/4.0
- **Achievements:** 95% overall average
- **Coursework:** Numerical Analysis, Inferential Statistics, Logical Reasoning, Algorithms, Optimization

EXPERIENCE

Asana

May 2024 - Aug 2024

Software Engineering Intern

San Francisco, CA

- Delivered and deployed the Team Sharing feature with a 100% rollout, applying robust software design principles to enforce secure access controls based on feature flags.
- Resolved a critical bug in the privacy settings CTA to ensure consistent and accurate messaging for projects involving multiple teams.
- Enhanced task collaboration by integrating team member @mentions, reinforcing seamless web application development.
- Crafted an interactive hovercard for teams, showcasing key details and incorporating intuitive navigation to user profiles and team pages.
- Optimized typeface search functionality by leveraging efficient algorithms to prioritize endorsed teams in project sharing and boost result accuracy.
- Refined core UI components to display comprehensive team information during project creation, thereby advancing user experience and project management efficiency.

Uber Technologies Inc.

Jun 2022 - Sep 2022

Software Engineering Intern

San Francisco, CA

- Enhanced the user interface of Uber's data ingestion tool to streamline the experience for 500+ internal users, incorporating principles of cloud-native applications for reliability and scalability:
- Optimized and refined lengthy API calls using TypeScript, leveraging best practices in infrastructure for distributed systems to improve performance and accelerate response times.
- Streamlined page navigation through URL formatting, thereby enhancing overall web application performance and reducing navigation delays.
- Investigated, designed, and implemented a feature for configuration keys deletion and staging configuration edits, significantly streamlining process management and reducing update times by 30%.

Uber Technologies Inc.

Jun 2023 - Sep 2023

Software Engineering Intern

San Francisco, CA

- Designed, implemented, and launched an alert system that enhanced the reliability of the data ingestion team by providing timely notifications for potential issues
- Provided timely alerts for potential Service Level Agreement breaches, reducing downtime and maintaining service quality
- Engineered a Pipeline that proactively monitored active workflows to ensure they operated within their designated time frames, thereby guaranteeing a seamless data ingestion process.
- Improved on-call efficiency by 35%, allowing engineers to focus on high-impact tasks.

SKILLS AND INTERESTS

- **Programming Languages:** Python, JAVA, Go, Ruby, C++, JavaScript, Typescript
- **Web Development:** React, HTML, CSS, XML, Web Application Development
- **Data Structures & Algorithms:** Data Structures, Algorithms, Software Design Principles
- **Cloud & Infrastructure:** Cloud-Native Applications, Infrastructure for Distributed Systems, GCP, AWS, Azure
- **Machine Learning & NLP:** Building ML Models, Natural Language Processing, Production-Ready Models

LEADERSHIP, ACCOMPLISHMENTS & PROJECTS

Code2040 2022 finalist

Spearheaded an advanced AI-powered bot

- to optimize and transform financial market analytics.

Meta Above and Beyond Computer Science (ABCS) program

Impact labs Fellowship Finalist

Certificate in web development & web development tutoring

- Tutored 20+ students in HTML and CSS.
